The first 10 days of integration of the Cosmic Mega Shift's have been accomplished, leading into the new integral lecture round in the evolution of the whole....

Trust is what makes it possible to accept accelerated movement with curiosity, joy and openness and you are only at the beginning of a great phase of movement. The more profound your capitulation of the human mind/ego, the higher the readiness for the next epic leap into the higher dimension/expansion of your consciousness.

Many people are afraid to heal because everything revolves around the trauma. They have no idea who they are outside the trauma, and the unknown can be scary.

Despite the many naturally universal/interstellar source code activations, their veil to reality is so tightly woven that the true power of their light cannot break through it.

Bio Chemical Fact - Your brain and heart consist of 73% water, lungs of about 83%, skin of 64% muscles, kidneys of about 79% and bones of 31%, a dehydration of only 2% has a negative effect on mood and memory factors. When you feel thirsty your brain chambers are already clearly dehydrated which produces and transports chromosome damage (chromosomes are located in every nucleus of the human cell).

At the same time, people have a magnetic 6th sense to discover something we can't even see.

The human eye captures only 1% of the spectrum of visible light, which means that we can only see 1% of the things around us. In other words, we cannot see 99% of the world we live in - existence is invisible.

Free will has a humanly created virus stored in the system of evolution.

While in the first (up to the completed) seven years of an incarnation the physical as well as the subtle body are tightly woven to the information database of the source as unity of both, in the following years the own creative power of a structure or world view begins to strengthen. Impressions from the outside as well as created images/puzzle pieces from within are connected with each other and create constructs with the mind which can accompany a life.

Experienced traumas of this phase, even if the earthlings have long been "human adults" and are actually aware of their strength and independence, have a significant role, often reflecting the injured essence of the inner being. They have buried their natural connection to unity. They long for the natural connection, the basic trust in the unknown childlike curiosity to see the worlds with open hearts.

The crux of it is, without the memory of the natural curiosity about life, the simple HEART BEING, no matter how intensely compressed the download may be, its own created creation cannot be permeated.

Earthlings choose their emotions in each of their structure of the mind of a situation - an illusion. Emotions constructs are conscious threads of our universal consciousness whose task it is to correspond to the maintenance of the resonance/mirror frequency field in various emotions. When we decide that we want to experience a particular emotion, these entities bring their energy to us for a moment and therefore feel desired.

The unconscious notion of time is to be seen as linear (which is not correct), the anchor that unconsciously traps it in this virus. Everything, including past lives and probable lives, is happening right now - inherent multidimensional source energy, creative power. Also the concept of past lives is actually wrong and an artificially maintained illusion in the emotional construct.

Happy is that as many earthlings notice the energetic activations and feel highly recovered by the last events.

The principle of love is the desire to give the law of love. It is a rhythmically balanced exchange between all gifts and giving. The symbol of love is the wave of dual light that equally and rhythmically feeds and renders - what you give comes back to you - the rhythm of karma is recreated every second, springs from your creation Self.

Understand that many have been programmed to fear what they do not understand. Some don't want to face the idea that they may have done wrong all their lives, but most of all they don't feel unconsciously ready for the responsibility that such a realization would entail. In this way they have separated the Eternal UNITY / WHOLE for themselves.

Your surrounding energy field, your plasma field - torus, or simplified aura, is primarily a ring/egg pattern similar to a giant Don.
